---

Denise,

We have not worked directly with MGV but the island is so small everyone knows everyone else's capabilities that we are confident that they can perform the work at Cabo Rojo. As part of the procurement process, they had to provide three or four references. Frances had long conversations with all of the references about the work performed by MGV. We are satisfied that they can perform as well as any of the other drillers (who submitted bids) on the island.

Susan

Susan,

Does CDM Smith has any previous experience working with MGV Geotechnical Group?
